

Test Results

Test Date: September 9, 2025
App Version: 1.0 (Prototype)
Test Environment: Android Emulator (API 34)

Feature Tested	Steps to Test	Expected Result	Actual Result
App Launch & Data Fetch	1. Launch the app from a clean state. 2. Observe the screen.	The app opens without crashing. The map and list populate with items from Firestore.	Pass
Map Display & Markers	1. View the map on the main screen. 2. Pan and zoom the map.	The map is interactive. Markers are visible at the correct coordinates for each item.	Pass
List Display	1. View the list on the main screen. 2. Scroll the list up and down.	The list is scrollable. Each item from the database is displayed as a card.	Pass
API Key Validation	1. Launch the app.	The map loads correctly without any "API key invalid" errors or app crashes.	Pass
Null Location Safety	1. Manually add an item to Firestore with no location field. 2. Run the app.	The app runs without crashing. The item appears in the list but not on the map.	Pass
